

Goth-style right-angle weave bracelet

- 11/0 black seed bead
- 3 mm czech firepolish, black
- 4 mm crystal, jet
- 5 mm crystal, vitrail medium
- 4 mm crystal, shadow crystal

Note: I used 4-strands of Beadalon 0.015" 7-strand beading wire, but this would probably work well with a strong thread such as PowerPro or Fireline. SoftTouch 0.010" would probably also work well (but is rather expensive).

at the end of the diagram above, there are 4 wires coming out of the end beads. using the diagram on the right, thread the wires so that there are 2 each coming out of the firepolish beads.
